

## FORMULA E OPERATIONS LIMITED

### SUSTAINABLE DEVELOPMENT POLICY

The FIA Formula E Championship, organised by Formula E Operations Limited (“Formula E”), recognises that its operations have the potential for both positive and negative environmental, social and economic impacts.

We aim to minimise our negative impacts in all three sustainability areas and commit to satisfy all applicable legal and other requirements. We will review our compliance with legislation and with this policy, measure our progress and continually improve wherever practicable.

Formula E is the world’s first single-seater electric street racing series, bringing thrilling motorsport entertainment to the heart of iconic cities.

Our championship is a competitive platform to test and develop road-relevant technologies, acting as a catalyst for sustainable mobility solutions and helping refine the design and functionality of electric vehicle components.

Our purpose is to reinvent racing and to make electric mobility a global reality – one race and one city a time.

Our values are: leadership, collaboration, credibility, dynamism, passion, inclusivity, and legacy.

We regularly review our values to ensure they align with the governing principles of sustainable development: stewardship, integrity, transparency and inclusivity. To ensure these principles are adhered to, we are operating in line with the international standard for sustainable events management: ISO 20121.

Formula E has set the following sustainable development objectives:

- Monitoring and measuring our event operations performance as well as our environmental and social impacts

Formula E Operations Ltd, 3 Shortlands, 9th Floor, Hammersmith, London W6 8DA [www.fiaformulae.com](http://www.fiaformulae.com)

- Developing a strategic community engagement plan to engage with our stakeholders and leave a positive legacy
- Engaging the supply chain to effectively meet our common sustainability goals

At Formula E, we aim to achieve our objectives through the promotion of employee involvement and a clear definition of management responsibilities and actions. Targets have been set for each objective to effectively monitor our progress and measure our success.

We are committed to demonstrating leadership in sustainability at our events and to continually improve our systems and operations.

This policy will be reviewed annually and shared with all our employees and stakeholders. It will be available to the general public via our website [www.fiaformulae.com](http://www.fiaformulae.com) and upon request.
